DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-10, drawn to a feed grip having a plurality of teeth and a pair of annulus, classified in class 83, subclass 711.
 - II. Claim 11, drawn to a food slicer having a carriage and feed grip, classified in class 83, subclass 730.
 - III. Claims 12-15, drawn to a feed grip having recessed gripping plate and overmold layer, classified in class 83, subclass 409.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions of groups II and I/III are related as combination and subcombination.

Inventions in this relationship are distinct if there is evidence that the combination does not rely on the subcombination for patentability. See MPEP 806.05 (c), example 3.

Group III is evidence that the combination of group II does not rely on, for example, the wave washer of group I; and conversely, group I is evidence that the combination of group II does not rely on the recessed gripping plate and overmold layer of group III for patentability.

3. Inventions of Groups I and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, the gripping plate with recess and overmold of group III could be employed without the wave washer and pair of annulus as in group I; and conversely, the wave washer and pair of annulus as in

group I could be employed without the gripping plate with recess and overmold of group III. See MPEP § 806.05(d).

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
